Fan model CONFIGURATIONS

HOUSING Fans

- . Direct drive
- . Clutch drive
- . Belt drive
- . Max. volume flow up to 450,000 m³/h
- . Max. pressure up to 25,000 Pa
- . Media temperatures up to:
 - max. 400 °C (direct drive)
 - max. 700 °C (belt and clutch drive)
- . Swing-out and roll-out designs
- . Gas-tight designs
- . Custom designs to customer-specification, e.g. with horizontal housing

FREE-WHEELING

- Configured for equipment installation with motor in the airflow for use in air-conditioners, etc.
- Configured as duct installed fan with motor outside of the airflow for painting lines – as roll-out version on request
- . Customer designs, e.g. for cheese dairies and malting plants
- . Backward curved high-performance impellers
- . Impeller diameter up to 2,000 mm
- Custom configurations with galvanized or teflon-coated impellers

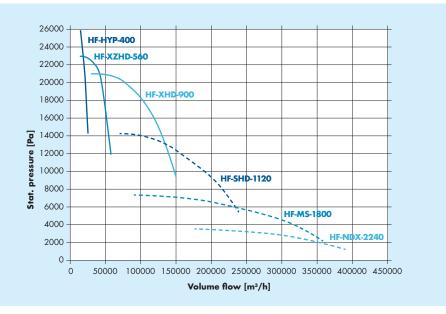

INSERT Fans

- . Direct drive
- . Belt and clutch drive
- . With insulation box
- . Fold-out feature
- . Backward curved high-performance impellers
- . Impeller diameters up to 2,000mm.
- . Media temperatures up to:
 - max. 400°C (direct drive))
 - max. 700°C (belt and clutch drive)

Made completely in-house MADE IN GERMANY

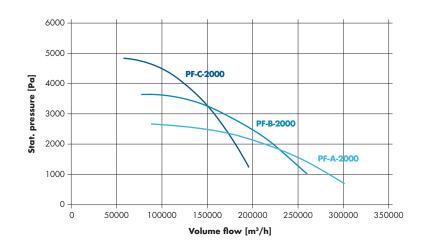

Characteristic line overview

Free-wheeling fans Large type series

KARL KLEIN Ventilatorenbau GmbH Branch office

Obere Donitzschkau 1 07607 Eisenberg Germany

Phone 0049 (0)711 369 06 - 0 Fax 0049 (0)36691 8684 -12 info@karl-klein.de www.karl-klein.de

Accessories

- . Compensators with baffle plate
- . Mating flange, transition elements
- · Vibration dampers: rubber dampers, spring isolators, etc.
- . Secondary noise protection measures such as
 - housing insulation
 - noise protection hoods
- . Pressure controller
- . Vibration monitor
- . Storage temperature monitor
- Ring measurement line for integrated volume flow metering
- Backstops
- Brakes

Fan service

- . On-site assembly and commissioning
- Brand-independent repair, mobile balancing service, mobile bearing exchange
- Energy-efficient overhaul of existing fans in consideration of existing installation dimension

ATEX Fans

- . ATEX-rated fans for use in
 - Zone 1 and Zone 2 for gas-rated category 2G or 3G
 - **Zone 21 and Zone 22** for dust-rated category 2D or 3D

 Detailed information concerning explosion protection of fans can be found under the following link:

www.karl-klein.de/technik/ex-schutz/

The company

- Family owned and operated with three facilities in Germany and 150 employees
- Headquarters in Aichwald with production of 800 1,000 fans per week
- . Impeller production in Crailsheim
- Production facility in Eisenberg/Thuringia with production of heavy-duty industrial fans
- . World-wide sales of radial fans
- A metal press-shop founded in 1950 was converted into a production facility for radial fans in 1965
- . We are driven by solutions to customer-specific requirements
- We continuously expand out market position with innovative products

Fan manufacturing expertise

- . Series or one-off production to customer specification
- . Standard products for niche applications
- . Customer-oriented CAD design-engineering
- Development based on flow simulations (CFD) and impeller modeling (FEM)
- Flexibility due to high vertical integration in our in-house, state-of-the-art sheetmetal processing centers
- Impeller production with various materials (sheemetal, stainless steel, aluminum, etc.)
- . Sophisticated balancing machinery
- . Fast response times
- Short leadtimes for complex products
- . Consulting for all design issues related to fans

Outstanding multi-sector customer relationships shape our actions and thinking.

250.000 m³/h

200.000 m³/h

= 150.000 m³/h

= 100.000 m³/h
